

Dear OpenAI Team,

I am writing to express my deep interest in the OpenAI Internship Program. As a dedicated software engineering student with a passion for innovation and ethical AI development, I am eager for the opportunity to learn, contribute, and grow at an organization leading the frontier of artificial intelligence.

What inspires me most about OpenAI is your mission to ensure that AGI benefits all of humanity. The chance to work on impactful, real-world projects alongside brilliant minds at OpenAI is exactly the kind of environment I aspire to be in — one that values curiosity, rigorous thinking, and a commitment to positive global change.

Over the past two years, I have focused on strengthening my skills in software development, particularly in front-end technologies and user interface design, through academic work and personal projects. I am now looking to apply that experience while expanding my understanding of AI systems, research practices, and scalable software development at OpenAI.

I believe strongly in learning by doing, and I see this internship as an extraordinary opportunity to do just that. If selected, I will bring with me a deep enthusiasm for OpenAI's mission, a strong work ethic, and a constant drive to improve and contribute meaningfully to the team.

Thank you for considering my application. I would be honored to be part of OpenAI's journey toward building safe and beneficial AI.

Warm regards,

Fatima Batool
